Summary

Detail-oriented Computer Science graduate with extensive project experience in Python, SQL, and web programming (HTML, CSS, JavaScript). Completed a full-stack e-commerce project and obtained cloud basics certification. I am eager to contribute problem-solving and coding skills to an entry-level software engineering position.

Projects

Project Approval System – MERN Stack Web App Link to Demo

Tech Stack: MongoDB, Express.js, React.js, Node.js, REST APIs

Enhanced a scalable MERN application with separate admin, reviewer, and student portals. Implemented JWT authentication, password hashing, and protected routes for secure access. Designed MongoDB schemas and RESTful APIs to support real-time project status updates.

Campus Buddy: Voice-Guided Navigation System Link to Demo

Tech Stack: Python (Flask), gTTS, Speech Recognition, SQLite

Developed a voice-guided navigation system to assist 35+ campus visitors in locating departments easily. Integrated online **Speech Recognition** and **Google Text-to-Speech** (gTTS) for real-time responses, improving guidance accuracy by 90%. Executed Tanglish (Tamil + English) support, enhancing accessibility for local users.

The Brownie Bar — Full-Stack Web App Link to Demo

Tech Stack: Python (Django), SQLite, HTML, CSS, JS

Improved a full-stack web application using Django and SQLite for managing products and users. Applied basic backend APIs for login, product management, and orders. Created admin and customer dashboards with authentication and CRUD functionality.
